Recommendation

◆ 313.91 USD/t

Launch Phosfusion 65-35 at 313.91 USD/t with the reference-minus method, and review it once prices and freight are on the same date.

Why

- It prices Phosfusion on the same nutrient basis as TSP at 640 USD/t.
- Unit cost is 310.90 USD/t, 344.28 below TSP, from cheaper raw materials.
- Value pricing leaves room up to 740.99 if the 0.12 t/ha yield gain holds.

Margin vs TSP

Metric	Phosfusion 65-35	TSP	Δ
CGM/t	3.02	-15.18	▲ 18.20
CGM/t P2O5	13.37	-33.00	▲ 46.37
Total margin, USD/yr	2.2 M	—	—

Risks & open flags

- P1The price is 59.17 below the cost-plus floor of 373.08.
- D1Prices (Argus, 21 Apr) are 5 months older than freight (24 Sep).
- U1Yield gain 0.12 t/ha is not backed by an agro test.
- C2Product PCF 0.5 is a dummy value.
- M1No market benchmark yet.
- A1Market share 5 % is an agent assumption.
